We help healthcare make even smarter decisions

Mede/Analytics®

When data is aggregated and analyzed in an intelligent way, it tells a story that empowers decision making. With our healthcare-specific, cloud-based analytics platform, we help payers and providers gain true business value from their data and achieve the outcomes that drive success in today's healthcare economy.

It's not about data. It's about what we do with it.

Addressing the complexities and real-world business issues of healthcare, our MedeWorks™ platform and healthcare-ready SaaS applications empower decision making with machine learning, predictive analytics and guided analysis to deliver the insights that improve cost and quality.

These enterprise analytics solutions are designed to meet the holistic needs of IDNs, healthcare delivery systems, ACOs, health plans and the public health sector.

providers

Mede/Analytics®

About MedeAnalytics

Established in 1994, MedeAnalytics was the first to market with a healthcare analytics SaaS solution. Today, that spirit of innovation continues with an analytics platform and solutions that include advanced technologies like machine learning, guided analysis and predictive analytics.
