Easily identify and address key areas for performance advancement

Clinicians are constantly pulled in varying directions and are balancing an array of priorities, so it can be challenging to engage them in professional improvement initiatives. The trick? Use data to demonstrate how clinicians will benefit from simple changes in documentation and coding practices.

Using the robust analytics available in Physician Insights, you can identify billing and coding audit risk for professional claims line items, find unspecified code usage, and compare E&M by specialty with benchmarking based on Medicare Part B Physician/Supplier procedure summary data (PSPPS).

Why you need Physician Insights

Whether you need to quickly identify areas of improvement around documentation integrity, reducing denials, or HCC analysis, Physician Insights offers fast, reliable answers to your important questions.

Benchmark E&M code usage to CMS

Go from
reactive to
proactive

Use self-service
analytics to
power success

Gain holistic analytics
support to drive
goals forward

Save time with
three-clicks-to-
insights speed

With MedeAnalytics Physician Insights, you can:

- Easily access data insights that identify gaps in coding and documentation, allowing for education and proactive efforts to protect revenue.
- Gain real-time, self-service insights into financial, clinical and operational improvement opportunities so interactions happen efficiently.
- Create mitigation and education plans to improve clinical and financial outcomes.
- Integrate with the complete Revenue Integrity Suite to support data-driven initiatives across physician groups and health systems.

Measurable impact

- Lessens time spent on reporting by **95%**
- Improves RVU performance by **15%**
- Reduces E/M coding variance by **20%**

"Leveraging data-driven insights from our CDI initiative helped us engage and educate our physicians, foster healthy competition, and enable higher productivity and performance."

- Michele Morton, Director of HIM Services at HOAG
