

Get the most from your MedeAnalytics products

MedeAdvise consulting services leverages the expertise of the MedeAnalytics Product Consulting team to help payers and providers maximize the value of their MedeAnalytics investments.

With nearly 300 years of collective experience across the healthcare industry, the Product Consulting professionals guide your organization down the path to successful data analytics solution implementation and long-term financial, operational and clinical outcomes.

Through MedeAdvise, the Product Consulting team can:

- Identify your organizational and analytics needs
- Craft your MedeAnalytics strategy
- Address business challenges through use case driven application of MedeAnalytics solutions
- Foster staff proficiency and adoption of MedeAnalytics solutions
- Leverage industry best practices post-deployment
- Drive value from MedeAnalytics solutions faster

Why you need MedeAdvise

Launching an effective data analytics program is one of the most important initiatives a healthcare organization can undertake. With MedeAdvise, our Product Consulting team will help you maximize your return on investment, ensuring your organization achieves its business goals. The team's vast industry expertise and collaborative, hands-on approach throughout the process accelerates and amplifies value derived from your MedeAnalytics solution investment.

Potential returns

- **50-60%** decrease in registration-related denials
- **25-75%** less time spent registering patients
- **50%** increase in point-of-service collections
- **50%** reduction in denials
- **95%** reduction in time to build reports

"The team has a wealth of knowledge and experience that is key in guiding a large plan like us in the right direction for certain scenarios. They understand the complexities of our plan and have provided us with a great deal of insight and guidance along the way. We are looking forward to our long-term strategic partnership with this team."

- Karin M. Ranft, Manager, Market Facing Analytics, a division of Customer Engagement & Insights, Highmark

Overview of MedeAdvise consulting packages

The Product Consulting team provides professional support and guidance throughout the analytics lifecycle, from implementation to post-production consultation, to ensure the entire process goes smoothly. Product Consulting helps you take advantage of industry best practices using procedural or operational readiness assessments.
