

Enterprise analytics for improved Medicare Advantage performance

Unify quality, risk, financial, and member experience analytics

Medicare Advantage plans face mounting pressure to improve Star Ratings, optimize risk adjustment, manage costs, enhance member experience, and navigate an increasingly complex regulatory environment. Yet many organizations continue to rely on fragmented data, manual reporting, and disconnected point solutions that limit visibility into the performance drivers that matter most.

Medicare Advantage Insights from MedeAnalytics delivers a unified view of member, provider, quality, risk, and financial performance—empowering health plans to make faster, more informed decisions that improve outcomes, increase revenue, and drive operational efficiency.

The challenge

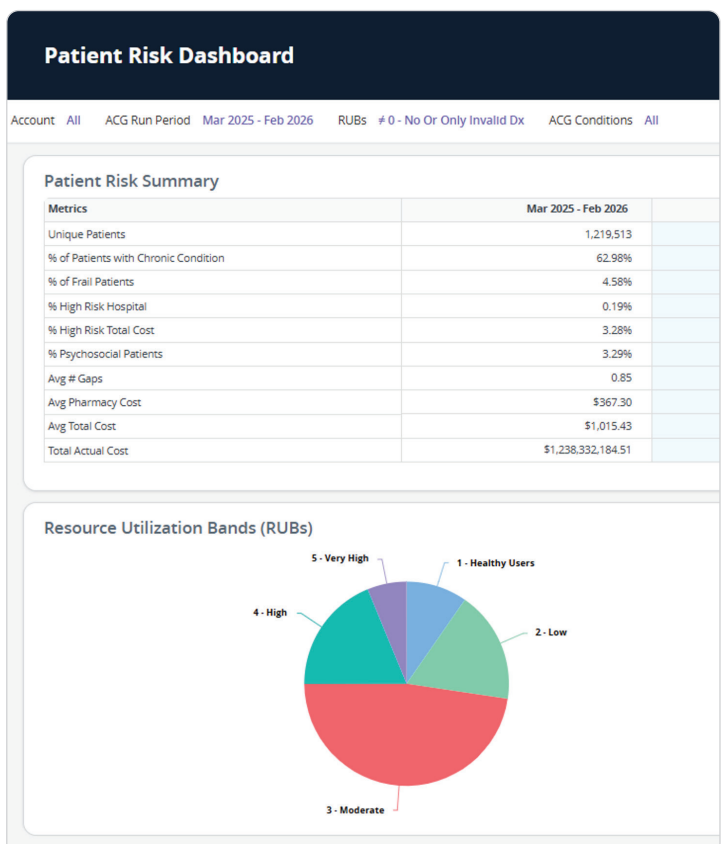

Without a connected view across risk, finance, quality, and member experience, Medicare Advantage plans face:

- Missed quality bonus payments tied to Star Ratings performance
- Inaccurate HCC coding and RAF capture that impact CMS reimbursement
- Limited visibility into member satisfaction and churn drivers
- Rising medical costs and utilization
- Inefficient, manual reporting processes
- Siloed teams working from conflicting data sources

The MedeAnalytics advantage

One platform. Complete Medicare Advantage visibility.

Medicare Advantage Insights centralizes data from CMS Medicare Advantage files (MMR, MOR, and MOA), claims, clinical systems, provider data, surveys, and operational sources to provide a comprehensive view of plan performance.

With embedded analytics and reporting, plans can:

Optimize risk adjustment and revenue

- Improve HCC coding accuracy and RAF performance
- Identify documentation and coding gaps
- Monitor premiums, subsidies, payments, and risk scores

Improve Star Ratings and quality performance

- Monitor Star Ratings and HEDIS measures
- Identify care gaps and intervention opportunities
- Track quality measure performance in real time
- Improve quality bonus payment performance

Manage population health proactively

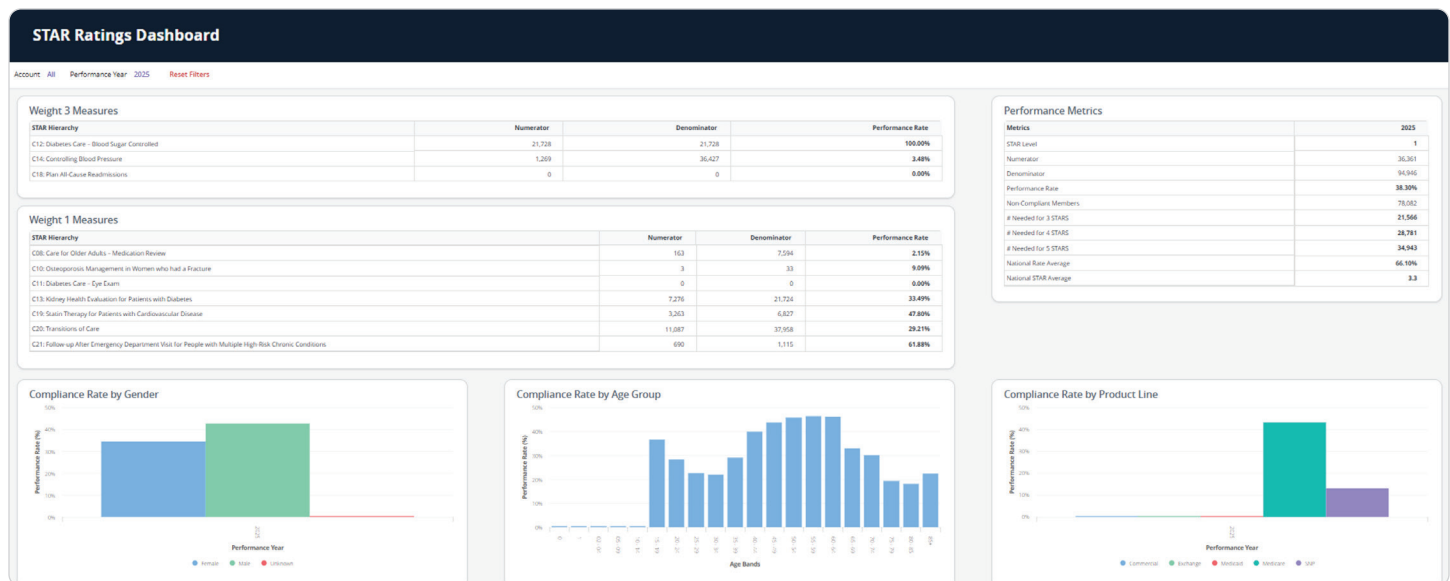

- Segment members by risk and health status
- Identify high-risk populations
- Support chronic condition management
- Reduce avoidable utilization and hospitalizations

Enhance member experience and retention

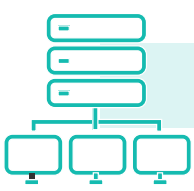

- Analyze member satisfaction and engagement
- Identify churn risks and experience gaps
- Monitor CAHPS-related performance drivers
- Improve retention and loyalty

Optimize cost and operational performance

- Forecast costs and utilization trends
- Evaluate provider performance and network adequacy
- Improve resource allocation and operational efficiency
- Streamline regulatory reporting and monitoring

How it works

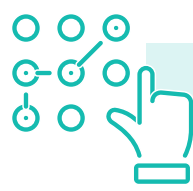

Unify data from CMS files

Medicare Advantage Insights consolidates data from CMS Medicare Advantage files (MMR, MOR, and MOA), claims, electronic health records (EHRs), provider data, member surveys, call center interactions, and other operational systems to create a trusted, comprehensive view of members and plan performance.

Analyze performance across domains

Advanced analytics continuously evaluate quality, risk, financial, utilization, provider, and member experience metrics. Built-in reporting and dashboards help stakeholders monitor Star Ratings, RAF performance, care gaps, member risk, premiums, subsidies, payments, and other key indicators.

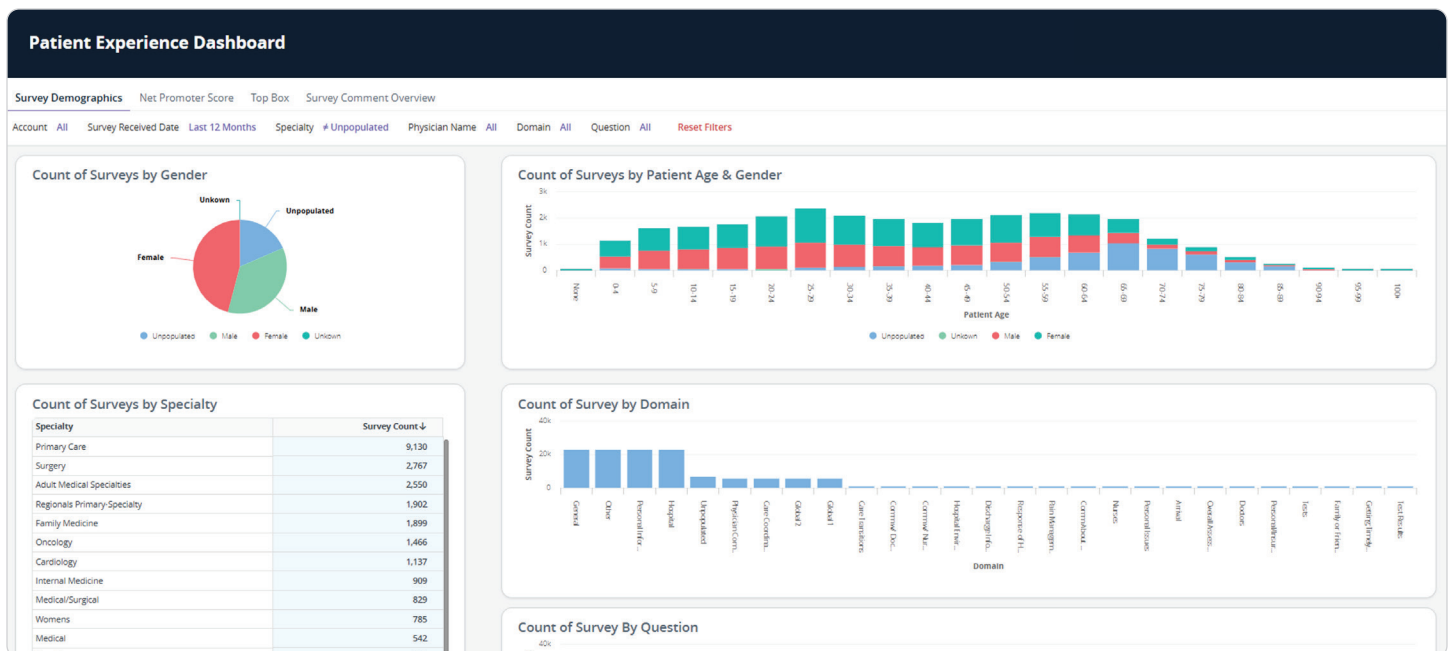

Surface actionable insights

Embedded analytics identify coding opportunities, documentation gaps, high-risk members, quality measure performance issues, provider performance trends, and member experience challenges—enabling teams to prioritize the interventions that will have the greatest impact.

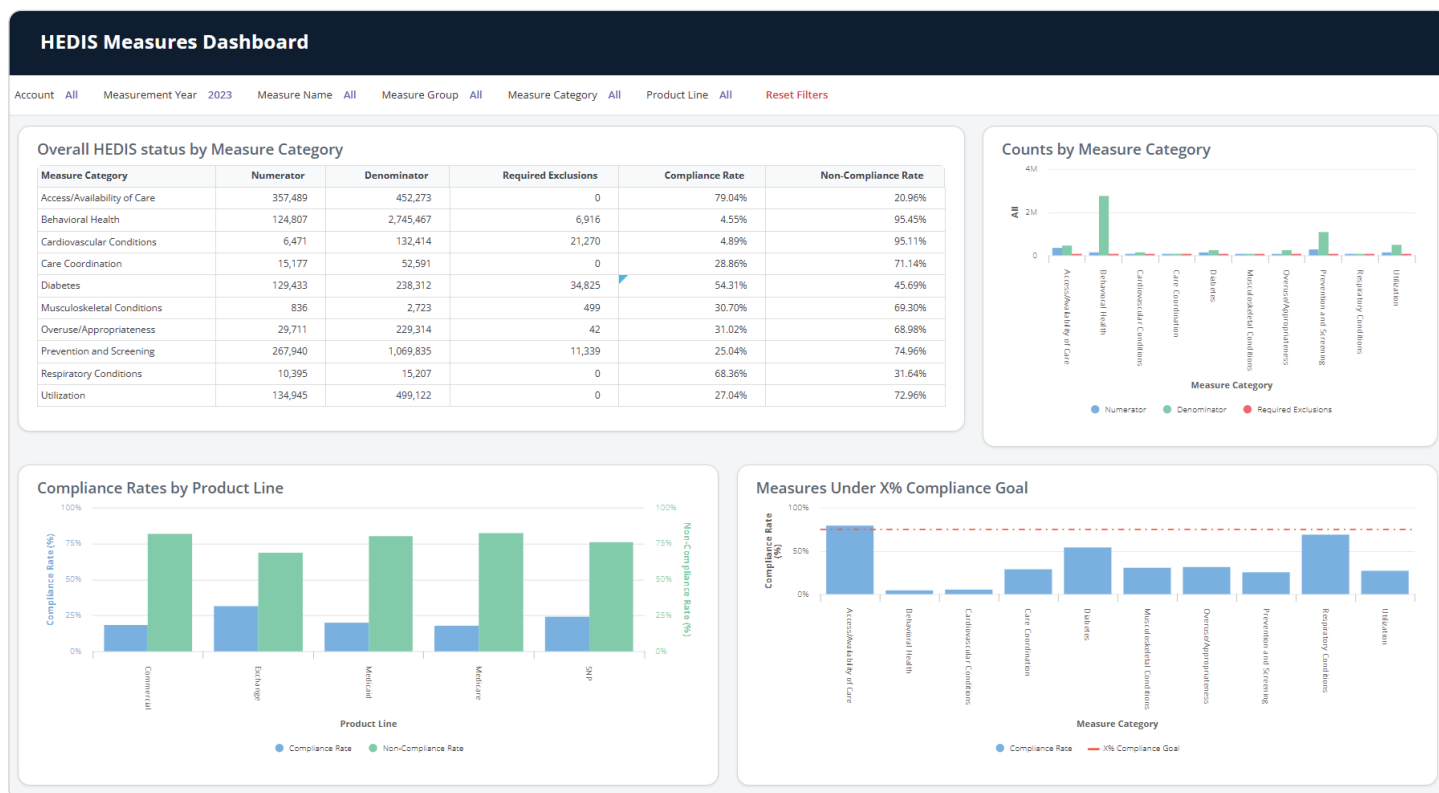

Drive continuous improvement

Automated monitoring, reporting, and performance tracking help organizations proactively manage risk adjustment, quality improvement, compliance, population health, and member engagement initiatives while measuring progress over time.

Move Beyond Reporting. Drive Medicare Advantage Performance.

MedeAnalytics helps Medicare Advantage organizations connect quality, risk, financial, and member experience data in one trusted analytics platform—turning fragmented information into actionable insights that improve outcomes, revenue, and growth.

Key differentiators

- Unified analytics across quality, risk, finance, SDOH, utilization, and member experience
- Scalable enterprise platform supporting Medicare, Medicaid, and Commercial lines of business
- Purpose-built for Medicare Advantage plans
- Integrated CMS MA reporting and analytics
- Embedded predictive analytics and actionable insights
- Detailed reports with transparent calculation logic and drill-down capabilities

Learn how Medicare Advantage Insights can help your organization improve Star Ratings, optimize revenue, and deliver better member outcomes.
